MUHAMMAD ZIDANE SC

Software Engineer | Full Stack & Platform Architecture

Bekasi, Indonesia (Open to Remote) • zidanesc02@gmail.com • +62 895-3010-7193 • linkedin.com/in/zidane-sc • github.com/zidane-sc

PROFESSIONAL SUMMARY

Software Engineer with **5+ years of professional experience** engineering scalable backend services, full-stack web applications, and resilient data pipelines across **Golang, TypeScript/Node.js, and PHP (Laravel)**. Delivered **100+ production features** across recruiter ATS platforms, enterprise HRIS suites, retail pharmacy POS/OMS, multi-tenant billing systems, and real-time multiplayer platforms. Currently serving as **Squad Lead (Backend)** at Dealls (YC W22) & KantorKu HRIS, leading backend technical delivery, authoring system architecture specifications, and unblocking engineering teams across sprint lifecycles.

TECHNICAL SKILLS

Languages: Golang, TypeScript, JavaScript (ES6+), PHP, Python, Dart, Kotlin, SQL, Bash

Backend & Systems: Clean Architecture, Domain-Driven Design (DDD), Event-Driven Architecture, Microservices, gRPC, REST APIs, Fiber, NestJS, Express, Laravel

Databases & Search: PostgreSQL (pgx pool tuning, indexing, query profiling), MySQL, MongoDB, Redis (distributed locks, caching), Elasticsearch (custom bilingual tokenizers)

Cloud, Messaging & DevOps: Google Cloud Platform (GCP), AWS (S3, CloudWatch), Kubernetes, Docker, Docker Compose, Apache Kafka, BullMQ, CI/CD

Frontend & Protocols: React, Next.js, Vue.js, Flutter, Android Native (Kotlin), WebSockets, Modbus Serial IoT, Model Context Protocol (MCP)

PROFESSIONAL EXPERIENCE

Dealls & KantorKu (YC W22)

Jakarta, Indonesia (Remote)

Squad Lead (Backend) **Jan 2026 – Present**

Leading backend technical delivery, architectural specifications, and execution across ATS and HRIS suites.

- **Squad Technical Leadership:** Direct backend task breakdowns, conduct root cause analysis (RCA) on timeline slips, and coordinate cross-functional technical dependencies across gRPC/REST microservices, Frontend, Mobile, and SRE.
- **Indeed ATS Integration & Sync:** Architected bi-directional job posting synchronization and applicant ingestion processing **936 candidate applications in a single automated batch**; decoupled deduplication into background queues with idempotent webhook consumers.
- **Enterprise Document Library & E-Sign:** Built corporate Document Library microservice in Go from ground up; authored technical analysis and API specifications for digital E-Sign integration and stabilized service handover.
- **Automated Interview Scheduling:** Designed relational database schemas and conflict-locking mechanisms for recruiter interview coordination and calendar slot reservations.
- **Multi-Company & Holding Group Architecture:** Designed technical architecture and authorization models for Multi-Company and Holding Group management across HRIS and ATS, enabling conglomerates to administer subsidiaries from a unified dashboard.
- **ATS x HRIS Taxonomy Normalization:** Authored technical analysis and schema design for cross-platform data synchronization between ATS and HRIS, standardizing job role taxonomies and candidate-to-employee onboarding pipelines.

Backend Engineer (Full-Time) **May 2022 – Jan 2026**

Engineered core platform services across Dealls B2C Job Portal, Recruiter ATS, and SejutaCita Platforms.

- **High-Precision Search Engine:** Re-architected Elasticsearch indexing and custom Indonesian/English synonym tokenizers, maintaining **sub-100ms P95 latency and 99.38% HTTP availability** across millions of job search queries with zero 5xx errors.
- **Recommendation Architecture POC:** Authored technical specification and POC for matching **1.74M talents** with 6,000 active jobs, evaluating real-time scoring vs precomputed cron pipelines to eliminate database resource bottlenecks.
- **Candidate Scoring & Ranking Algorithm:** Designed recruiter talent scoring heuristics evaluating university tiers, years of experience, and skill vector matches to rank thousands of applicants in seconds.
- **Multi-Gateway Payment Infrastructure:** Architected foundational multi-account payment gateway routing; integrated Midtrans (QRIS, Virtual Accounts, e-wallets) with automated invoice cancellation state machines.
- **National Event Platforms (SFL & IHBS):** Built backend and relational PostgreSQL schemas for national competition platforms, decoupling event storage from monolithic databases to withstand massive registration traffic spikes.
- **Recruiter Admin & Employer Portal:** Engineered candidate evaluation pipelines, automated WhatsApp and email notification triggers, and advanced talent filtration interfaces for enterprise recruiters.
- **Asynchronous Email Queue Architecture:** Refactored critical transactional email and password-reset dispatch from synchronous HTTP handlers to BullMQ background workers with dead-letter queue retries.
- **Company Slug Architecture & SEO Sitemaps:** Re-architected company slug routing across job portal microservices, admin consoles, and dynamic XML sitemap generators to boost organic recruiter visibility.
- **Database Profiling & Optimization:** Profiled and restructured high-volume candidate aggregation queries in MongoDB, cutting endpoint latency on heavy recruiter dashboards.

PROFESSIONAL EXPERIENCE (CONTINUED)

Roxy Group (Apotek Roxy)
Jakarta, Indonesia (Hybrid)

Full Stack Engineer (Contract) **2025 – Present**

- **Retail Point-of-Sale (POS):** Architected pharmacy checkout backend in Golang Clean Architecture with bounded PostgreSQL connection pooling and atomic inventory deduction; built cashier user interfaces in React.
- **Order Management System (OMS) Booking:** Delivered full-stack pharmaceutical service reservation module (Go backend + React dashboard) with concurrent appointment slot locking and conflict prevention.
- **E-Procurement Asset Lifecycle:** Engineered full-stack pharmacy branch asset management platform (Go, React, PostgreSQL), establishing multi-branch depreciation tracking and hierarchical purchase order approval states.

Courtwin Platform
Singapore / International (Remote)

Core Backend Engineer (Contract - International Client) **2023 – 2024**

- **Multi-Court Sports Booking Engine:** Architected reservation backend in TypeScript/Go supporting single/double bookings across multiple venues, dynamic pricing tiers, and currencies with race-condition prevention.
- **Clubhouse POS & Tournaments:** Built clubhouse point-of-sale, cash drawer session tracking, automated payment webhooks, and tournament player bracket generation algorithms.
- **Real-Time In-App Chat:** Engineered live messaging service utilizing WebSockets with connection tracking, heartbeat verification, and paginated chat history.

Prior Technical Engagements (Freelance & Internship)
Remote & Bandung, Indonesia

- **Sanbersy (Full Stack Freelance, May 2023 – Aug 2023):** Developed psychological assessment platform using Laravel and MySQL; engineered automated scoring and reporting algorithms for PAPI Kostik psychometric evaluations.
- **Jabar Digital Service (Backend Intern, Feb 2022 – Apr 2022):** Engineered internal employee attendance REST APIs and internal services using NestJS, PostgreSQL, and Docker/Kubernetes within an agile Scrum squad.

PT. Kamiko Cipta Solusi
Bekasi, Indonesia

Junior Software Developer (Full-Time) **Jan 2021 – Nov 2021**

- **Industrial IoT Telemetry:** Built telemetry ingestion services reading Modbus serial sensor packets in Node.js, streaming live coordinates to interactive Leaflet GIS map dashboards via WebSockets.
- **ERP Modernization:** Assisted in migrating legacy enterprise ERP systems to Laravel Framework; built automated maintenance work-order generation using Node-Cron scheduling.

VENTURES & TECHNICAL SYSTEMS PROJECTS

Thinkedge Studio
Bekasi, Indonesia

Co-Founder & Technical Lead **2025 – Present**

- **Commercial Client Solutions:** Co-founded digital engineering studio delivering commercial software: **Bank Sampah** (community waste recycling ledger & payouts), **Aromas** (product catalog showcase), and **Ocean Dental** (multi-clinic dental patient records & appointments).

Versamorph Studio
Systems & R&D Studio

Core Systems Engineer **2026 – Present**

- **MIPS Instruction Simulator:** Built web-based computer architecture demo visualizing 32-bit MIPS assembly instruction execution, register states, and basic pipeline stages.
- **StreamDonate Platform:** Enhanced real-time live-streaming donation overlay platform with browser-source alert mechanisms using Server-Sent Events (SSE) and Web Audio API synthesis.

Selected Personal Projects
github.com/zidane-sc

Author & Maintainer **2024 – Present**

- **Atlas (RPG Task Manager & MCP Server):** Full-stack task engine built with Next.js and PostgreSQL; features a Model Context Protocol (MCP) server enabling real-time agentic task tracking and live Kanban telemetry.
- **Real-Time Multiplayer Engines (SOS Online & Tebak Lagu):** Built server-authoritative multiplayer games featuring live WebSocket lobbies, room state synchronization, and Web Audio API synthesis.

EDUCATION & MENTORSHIP

Universitas Bina Sarana Informatika (UBSI)
Jakarta, Indonesia

Bachelor of Computer Science (S.Kom), Information Systems **2023 – Present**

GPA: 3.9 / 4.0 • Academic Focus: Database Systems Administration, Enterprise Systems Architecture, Cloud Computing.

Google Cloud Career Launchpad (DTS Kominfo)
Jakarta, Indonesia

Student Mentor **2024**

Awarded Certificate of Appreciation by Erin Rifkin (Managing Director, Google Cloud Learning Services) for mentoring 79 university students across cloud & AI tracks.

Key Professional Certifications
2021 – 2026

AWS Cloud Practitioner Essentials • Candradimuka Jabar Coding Camp (Backend Node.js, Rank #1, Score 99/100) • HackerRank Node.js Certified • Dicoding Azure Gen AI.
