# MUHAMMAD ZIDANE SC

**Software Engineer | Backend & Platform Architecture (Full Stack)**

Bekasi, Indonesia (Open to Remote) · zidanesc02@gmail.com · +62 895-3010-7193 · linkedin.com/in/zidane-sc · github.com/zidane-sc

## PROFESSIONAL SUMMARY

Backend-focused Software Engineer delivering software since 2020 across recruitment platforms, enterprise HRIS, pharmacy operations, manufacturing ERP, and industrial monitoring. Builds **Go, TypeScript/Node.js, and Laravel** services, asynchronous integrations, data workflows, and full-stack products. Combines hands-on implementation, API/database design, production troubleshooting, and cross-functional technical delivery across commercial products and independent engineering projects.

## TECHNICAL SKILLS

**Languages:** Go, TypeScript/JavaScript, PHP, SQL.

**Backend & Architecture:** Node.js, NestJS, Express, Laravel, Go Fiber; REST APIs, gRPC, microservices, Clean Architecture, asynchronous/event-driven processing.

**Data & Search:** PostgreSQL, MongoDB, Redis, MySQL, Elasticsearch; data modeling, indexing, query optimization, migrations, caching, search/recommendation pipelines.

**Cloud & Messaging:** GCP, AWS S3, Kubernetes, Docker, Kafka, Pub/Sub, Bull/BullMQ, CI/CD.

**Integrations & Security:** Payment gateways (Midtrans), billing/webhooks, Indeed, Google Calendar/Workspace, WhatsApp APIs; RBAC, authentication/OTP, signature verification, rate limiting.

**Product Engineering:** React, Next.js, Prisma, WebSockets, MCP; Gemini/OCR integrations, structured document extraction, integration testing, production debugging, API/system design.

## PROFESSIONAL EXPERIENCE

### Dealls & KantorKu (YC W22)

Jakarta, Indonesia · Remote

***Squad Lead (Backend) · Full-Time*** **Jan 2026 – Present**

- **Technical Leadership:** Lead backend task breakdowns, API contracts, data modeling, and integration planning across ATS/HRIS services; coordinate dependencies with Frontend, Mobile, QA, and SRE.
- **Document Library & E-Sign:** Authored Go/PostgreSQL backend design and API contracts for hierarchical folders, access permissions, and annotation-based signing; implemented fixes for identity resolution, duplicate uploads, hierarchical search, recipient restrictions, preview/download streaming, and trash lifecycle.
- **Indeed Apply & Disposition Sync:** Authored integration analysis and contributed asynchronous webhook ingestion, screener-question synchronization, status mapping, and raw-byte signature verification, separating external intake from downstream application processing.
- **Multi-Company & Holding Groups:** Designed company/member schemas, Casbin permissions, pooled quotas, and company-context behavior; specified ATS–HRIS job-role normalization with migration scripts, embedding/LLM verification, CSV review, and dry-run/rerun safeguards.
- **Interview Scheduling & Task Workflows:** Authored availability, Google Calendar, invitation, and booking API/database designs; specified recurring tasks, comment mentions, activity logs, bulk changes, and multi-step approvals.
- **Recruiter Workflow & Reliability:** Contributed candidate scorecards, scoring recalculation, bulk application drafts/status operations, and background CSV exports; addressed N+1/batching issues in candidate operations and hardened email-OTP approval and failed-login limiting.

***Backend Engineer · Full-Time*** **May 2022 – Jan 2026**

*Selected engineering contributions across the Dealls tenure; some initiatives continued after promotion.*

- **Search & Recommendation:** Contributed Elasticsearch analyzer configuration, Indonesian/English synonyms, shingles/stemming, candidate evaluation, and scoring contracts; authored recommendation POCs comparing realtime scoring with precomputed background pipelines.
- **Matching & Retargeting:** Designed talent-blast and job-matching flows; contributed push retargeting and POCs using embedding/cosine similarity for newsletters and Jaccard similarity for work-experience matching.
- **AI CV Intelligence:** Contributed OCR and URL ingestion, Gemini analysis, language-aware prompts, structured resume extraction, embedding token-limit guards, Pub/Sub completion logging, zero-byte CV handling, and load-test resource tuning across CV review/parser/analyzer services.
- **Mentoring Platform:** Built mentor onboarding, profile synchronization, expertise/topics, scheduling, booking and conflict validation, approval, cancellation/rescheduling, attendance, referrals, notifications, and certificates.

- **Payments & Event Platforms:** Contributed multi-gateway/multi-account routing, checkout/webhook/receipt flows, timezone handling, and subscription billing; built SFL/IHBS/IDM program capabilities covering quizzes, fees, discounts, submissions, ticketing, certificates, and participant operations.
- **Messaging & Account Recovery:** Built WhatsApp master/slave service capabilities with Baileys, Redis-backed queues, retry/completion listeners, delivery controls, banned-account alerts, and gateway integration; moved password-recovery dispatch into background workers.
- **Job Discovery & Recruiter Operations:** Delivered saved jobs, user search, suggestions, external application links, company verification status, boosted-job requests, inactive-candidate auto-rejection, job statistics, and public job/company detail behavior.
- **Database Performance & Evolution:** Remediated N+1/batching issues in bulk candidate operations; investigated slow queries and refactored job statistics. Contributed portfolio/work-experience backfills, inactivity/external-application fields, and index/collection cleanup.
- **CMS & SEO:** Contributed blog pagination for latest/recommended/popular content, redirects, form exports, submission emails, author/editor permissions, and custom sitemap generation.
- **Account Security & Recovery:** Contributed token/HRIS authentication, email OTP approval gating, per-email failed-password limits, verification-link resend, WhatsApp recovery delivery, recovery OTP, and multi-active login support.
- **Technical Security Review:** Authored an IDOR analysis validating backend ownership checks around user work experience and preference endpoints.

### Roxy Group / Apotek Roxy

Jakarta, Indonesia · Remote

***Backend & Full Stack Engineer · Contract*** **2025 – Present**

- **Pharmacy POS:** Reworked legacy backend toward Go Clean Architecture; delivered fingerprint/device-bound cashier activity, open/close/reclose sessions, sales/returns, invoice printing, barcode/promotion stock lookup, and stock/price synchronization using gRPC and Kafka.
- **E-Procurement Asset Platform:** Built Go/Next.js/PostgreSQL asset hierarchy, depreciation/as-of valuation, financial snapshots, branch transfers, floor/room/PIC ownership, branch-scoped RBAC, allocation/receipt confirmation, QR verification, document storage, and executive analytics.
- **Tenant, Booking & Billing:** Built OMS tenant categorization, photos, cursor pagination, branch dashboards, and tenant journeys; delivered room/car approvals, Calendar invitations, WhatsApp/email notifications, agreements, advisory-lock invoice numbering, overdue reminders, and Excel/PDF exports.

### Courtwin

International · Remote

***Core Backend Engineer · Part-Time Contract*** **Jan 2023 – Apr 2024**

- **Sports Operations Platform:** Built TypeScript/PostgreSQL backend capabilities for court/venue reservations, tournament/match/player workflows, lessons/classes, customer profiles, payment settings, and API documentation.
- **Clubhouse POS & Chat:** Implemented cash-drawer/POS and sales capabilities alongside real-time WebSocket conversations, chat history, and supporting file-upload flows.

### Sanbersy

Remote

***Full Stack Developer · Freelance*** **Dec 2022 – Sep 2023**

- **Asesmen Online PKS DS:** Built Laravel/MySQL psychological and competency assessment capabilities including PAPI Kostik, dynamic test types, scoring, navigation/timers, remedial tests, personal histories, printable reports, and admin reporting.
- **ERP Oza Tea:** Developed ingredient categories/usage, product recipes and cost-percentage calculations, employee/position management and exports for F&B operations.
- **Content Management:** Implemented gallery, sliders, news, testimonials, owner/contact details, and message management for the client-facing site.

### Sirkel Kreasi Nusantara

Remote

***Full Stack Developer · Freelance*** **May – Aug 2022**

- **Hospitalpreneur Community:** Built Laravel API/React Native social features covering posts, quote posts, likes/comments, and Q&A with anonymous and polling behavior.
- **Engagement & Moderation:** Implemented FCM notifications, reporting/moderation, user blocking, coaching/consultation requests, authentication, and integration tests in a Docker/Nginx application environment.

### Jabar Digital Service

Bandung, Indonesia

***Backend Intern*** **Feb – Apr 2022**

- **Internal Attendance Services:** Developed employee-attendance REST APIs using NestJS and PostgreSQL within a Docker/Kubernetes-based Scrum environment.

### PT Kamiko Cipta Solusi / Grootech

Bekasi, Indonesia

***Full Stack Developer · Full-Time*** **Nov 2020 – Nov 2021**

- **Decotatoo Manufacturing ERP:** Contributed Laravel/PostgreSQL modules spanning employees/attendance, finance/journals, sales/purchasing, inventory, recipes/production, packing/shipping, HACCP reporting, and WooCommerce integration in a multi-contributor codebase.
- **JaGain Asset Maintenance:** Built asset hierarchy, work orders, maintenance schedules, material/BOM tracking, master-data permissions, and work-order search.
- **Water, Energy & Billing Monitoring:** Contributed water-consumption dashboards/trends, kWh billing, asset/material operations, and power-monitoring trends.
- **Production & Environmental Systems:** Contributed production planning/quantity automation, JPA Malindo alarm helpers, Telegram notification configuration and silo exports, KLHK/Modbus reader changes, and CEMS sensor/alarm controls.
- **Grootech CMS:** Built dynamic product/article/map content, contact/email flows, and image management.

## VENTURES & TECHNICAL SYSTEMS PROJECTS

### Thinkedge Studio

2025 – Present

**Co-Founder & Core Engineer**

- **Ecosphere / NexaSense:** Built Go/TimescaleDB industrial environmental-monitoring foundations and Next.js device/sensor/alarm interfaces; implemented permissions, migrations, OpenAPI, typed APIs, and server-side filtering/search/sort.
- **Dental Suite / Appointly:** Contributed to a Next.js/React/Prisma/PostgreSQL multi-branch dental SaaS organized around growth, patient connectivity, operations, and intelligence modules.
- **Ocean Dental:** Contributed Laravel/Filament clinic portal and admin capabilities with Tiptap content editing and PHPUnit tooling.
- **Bank Sampah / Sirkula:** Built Laravel/Livewire member management, waste deposits, pricing, inventory, financial ledger/reporting, member imports, and balance synchronization.
- **Institutional & Studio Websites:** Contributed Next.js/React UNJ FEB portal and Thinkedge company profile using Three.js/GSAP.

### Versamorph Studio

2026 – Present

**Core Systems Engineer**

- **MIPS — Maritime Integrated Port Simulator:** Built interactive port-simulation product interfaces using Next.js, React, TypeScript, and Zustand.
- **StreamDonate:** Enhanced PHP/Blade live-stream donation overlays and browser-source alert workflows using Server-Sent Events and Web Audio API.

### Personal Engineering Projects

Independent

**Atlas — RPG Task Manager & MCP Server**

- Built a Next.js/TypeScript/Prisma/PostgreSQL gamified task manager with a custom MCP endpoint enabling AI agents to create/update quests programmatically.

**Tebak Lagu — Multiplayer Audio Trivia**

- Built real-time multiplayer room and audio-trivia interactions using TypeScript, WebSockets, LibSQL/Turso, and Web Audio API.

**PCX Telemetry — Honda PCX 160**

- Developed a Flutter/Dart and PocketBase application for motorcycle telemetry and diagnostic workflows.

## EDUCATION & MENTORSHIP

***Universitas Bina Sarana Informatika — Information Systems, S.Kom (in progress)*** **2023 – Present · GPA 3.9/4.0**

***Google Cloud Career Launchpad — Student Mentor*** **Oct – Dec 2024**

Mentored **79 university students** across cloud/AI tracks; received Certificate of Appreciation signed by Erin Rifkin, Managing Director, Google Cloud Learning Services.

**Selected Training:** AWS Cloud Practitioner Essentials · Jabar Coding Camp: Node.js · Dicoding: Azure Gen AI.
